

GOWTHAM SUBRAMANI

Data Analyst | ERP & Business Intelligence

St. Paul, MN 55044 | +1 (651) 707-7507 | Gowthammani7s@gmail.com | [linkedin.com/in/gowtham-stkg](https://www.linkedin.com/in/gowtham-stkg)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL Server, Power BI, and ERP systems (SAP S/4HANA MM), built through both industry roles and a Master's program in IT & Management focused on analytics and business intelligence. Track record of cleaning and validating large datasets, writing optimized SQL to cut report turnaround time, and building Power BI/DAX dashboards that stakeholders use for day-to-day decisions. Comfortable working directly with cross-functional stakeholders to turn ambiguous requirements into reliable, production-ready reporting.

SKILLS

Data Analytics & Reporting: Power BI, DAX, SQL, Tableau, Microsoft Excel, Data Cleaning & Validation

Data Engineering & Database: SQL Server, MySQL, Databricks, Data Warehousing, Microsoft Fabric

Cloud & Business Systems: SAP S/4HANA MM, ERP Systems, REST APIs, Azure Fundamentals

WORK EXPERIENCE

Data Management Analyst — University of Wisconsin–Milwaukee, Milwaukee, WI

Sep 2025 – May 2026

- Maintained business data across SQL and ERP systems, reducing data-retrieval errors and improving turnaround on daily reporting requests.
- Cleaned and validated datasets ahead of analysis, catching data-quality issues before they reached stakeholder reports.
- Built Excel reports and dashboards giving stakeholders day-to-day visibility into operational data.
- Used SQL and Power BI to analyze trends and document reporting processes, cutting time spent tracking KPIs.
- Partnered with team members to reorganize shared datasets and standardize reporting workflows across departments.

Software Database Developer — Neel Tech International Pvt Ltd, Bengaluru, India

Jun 2022 – Nov 2023

- Developed and maintained SQL Server databases for ERP applications, ensuring data integrity and uninterrupted reporting for daily operations.
- Wrote and optimized SQL queries, joins, stored procedures, views, and indexes, reducing query execution time for business reports.
- Ran data validation and quality checks, catching and resolving inconsistencies before they reached business reports.
- Built interactive Power BI dashboards with DAX measures to track KPIs and surface trends for stakeholders.
- Gathered reporting requirements from cross-functional stakeholders and translated them into scalable BI solutions.
- Tuned database performance through indexing and execution-plan analysis, improving system reliability.

Web Developer — Zoho Creator, Chennai, India

2021

- Built and maintained business applications on the Zoho Creator low-code platform, improving internal workflows.
- Cleaned and transformed business data and built dashboards to visualize key metrics for stakeholders.
- Gathered requirements, tested functionality, and resolved issues to deliver features on schedule.

PROJECTS

Warehouse Inventory Management System (ERP Concept) — 2025

- Designed a SQL Server-based system to track stock levels, product movement, and storage locations, including a normalized schema and stored procedures for common inventory transactions.

AI-Based Face Recognition System with Privacy Considerations

- Built a face recognition system using image processing and machine learning techniques.
- Documented privacy and ethical considerations for handling biometric data.

EDUCATION

Master of Science, Information Technology and Management (GPA: 3.9/4)

University of Wisconsin–Milwaukee, USA | 2025 – 2026

Coursework: AI/ML, Data Analytics & Visualization, ERP Systems, Database Management Systems (SQL, NoSQL), Business Intelligence & Data Warehousing, Cloud Computing (Azure/AWS basics), Big Data Technologies (Databricks), Information Security & Risk Management

Bachelor of Information Technology

Sathyabama University, Chennai

Coursework: Operating Systems, Cybersecurity Fundamentals, Software Engineering, Web Development (HTML, CSS, JavaScript)

CERTIFICATIONS

- Microsoft Power BI Data Analyst Professional Certificate
- Microsoft Azure Fundamentals (AZ-900)
- AI & Machine Learning
- Front-End Web Development
